DETAILED ACTION

Response to Amendment

Claim 2, 17, 31, 42, 46 have been cancelled; therefore, <u>Claims 1, 3-16, 18-30, 32-41, 43-45</u>, and 47 are now pending in application 09/759,536.

Claim Rejections - 35 USC § 103

- 2. The rejection of Claims 1, 16, 30, 41, and 44 under 35 U.S.C. 103(a) as being unpatentable over Hedloy et al. (US 6,323,853 B1) is withdrawn due to Applicant's amendments.
- 3. The rejection of Claims 5, 12-14, 20, and 27-29 under 35 U.S.C. 103 as being unpatentable over Hedloy is withdrawn due to Applicant's amendments.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 5. Claims 1, 3-16, 18-30, 32-41, 43-45, and 47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement.
- 6. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Application/Control Number: 09/759,536 Page 3

Art Unit: 3629

7. Independent Claims 1, 16, 30, 41, and 44 describe analyzing an electronic source document available on a network of computers to determine a referenced entity identified in the document. However, neither the claims nor the specification describes how the system/method *determines* the "referenced entity" or corresponding identifier in the electronic source document from the remainder of the electronic source document material.

- 8. The specification further states: "The present invention may examine the context of the article to establish: 1) the points of contact within an entity that the reader or viewer most likely wishes to contact; and 2) entities that are not explicitly referenced in the article or video presentation, but may have substantive bearing on the issues discussed in the article or video presentation. However, neither the claims nor the specification describes how the system/method *determines* the initial entity or "entities that are not explicitly referenced" from the remainder of the electronic source document material.
- 9. Finally, the Examiner is not aware of any technology known at the time the invention was made that would enable the system/method (or make obvious) the extrapolation or resolution of detailed entity information (referenced entity, corresponding identifier, points of contact, entities that are not explicitly references) from a textual-based or audible-based source document, as described in the claimed invention.

Response to Arguments

10. Applicant's arguments filed 3/14/2005, with respect to Claims 1, 3-16, 18-30, 32-41, 43-45, and 47, have been fully considered, but are moot in view of the new ground(s) of

rejection.

Conclusion

- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Ouellette whose telephone number is (571) 272-6807. The examiner can normally be reached on Monday through Thursday, 8am 5:00pm.
- 12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on (571) 272-6812. The fax phone numbers for the organization where this application or proceeding is assigned (571) 273-8300 for all official communications.
- 13. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Office of Initial Patent Examination whose telephone number is (703) 308-1202.
